

Singular switchgear. Top to bottom.

SGC - SwitchGear Company creates entirely custom-built medium-voltage switchgear. Because no two switchgear installations are the same. That's why SGC works with you to build a solution that fulfils *your exact needs*. That's why we look beyond just

the cubicles: we look at the entire picture. *From the container, all the way down to smallest component.* SGC's switchgear is truly tailor-made.
